SUMMARY

Detail-oriented QA Engineer with 3+ years of experience in Software Testing across mobile (Android & iOS) and Web platforms. Proficient in Agile and Waterfall methodologies, with expertise in Functional, Regression, Smoke, Sanity, Exploratory, Accessibility, UI, Black Box, Ad hoc, and Globalization Testing. Skilled in creating test cases, test plans, and RTMs to ensure full coverage. Experienced in bug tracking and reporting using JIRA and TestRail. Knowledge of SQL, API testing (Postman), JMeter, and Automation with Selenium (Java). Strong communicator with solid coordination skills.

WORK EXPERIENCE

Test Engineer - Tech Mahindra Pvt Ltd

Oct 2022 - Present

- Collaborated with ICI's new onsite QA team to align product understanding and testing processes effectively.
- Guided offshore team members in understanding new features, ensuring smooth knowledge transfer and high-quality test coverage.
- Performed testing across various application architectures with a focus on accuracy and 100% efficiency.
- Managed individual and team workflows, ensuring timely task completion and optimized resource utilization.
- Maintained detailed and up-to-date testing reports, project documentation, and team effort logs for better visibility and planning.
- Built and sustained strong client relationships by providing prompt support and delivering consistent, high-quality service.
- Partnered with the onsite QA lead and development teams to execute testing for 10+ major releases, resulting in an 80% increase in testing efficiency.
- Designed and implemented quality control procedures to ensure deliverables met customer expectations and compliance standards.

PROJECT DETAILS

Meta Horizon Application (Android and IOS)

Thoroughly tested the Meta Horizon Application on Android and iOS, ensuring stability, usability, and performance across devices. Designed and executed detailed test cases; performed functional, regression, smoke, and exploratory testing. Collaborated with dev/product teams to log and resolve issues. Verified cross-platform consistency and UI responsiveness, ensuring seamless performance and contributing to high-quality, on-time releases.

Meta Quest3 & 3S Device

Thoroughly tested the boundary functionality of Meta Quest 3 and Quest 3S, validating room-scale spatial awareness, guardian setup accuracy, and edge-case scenarios in varied physical environments. Ensured precise boundary detection and responsiveness to prevent user safety risks and enhance immersive VR experiences. Collaborated closely with development and product teams to log and resolve defects, contributing to improved tracking reliability and user satisfaction.

EDUCATION

- Diploma & Bachelor's degree in Mechanical Engineering (2014-2020) 8.5 CGPA

ACHEIVEMENTS

Awarded the "Ace" Award (Sep 2023) for consistently delivering high-quality work and driving positive impact, and the "Bravo" Award (Sep 2022) for outstanding performance and valuable team contribution.
